Profile

Backend Developer with hands-on experience building and maintaining **production RESTful APIs** for live applications handling real users, bookings, and payments. Skilled in **PHP/Laravel and JavaScript/TypeScript with Node.js**, with a strong foundation in backend architecture, API design, authentication, databases, and business logic. Experienced in troubleshooting production systems and building **reliable, maintainable backend solutions**.

Professional Experience

Runsoft

Backend developer 03/2026 – Present | Egypt

BayToStay — Production Rental Booking Platform [Google play , app store]

- Delivered the **complete website backend** using **PHP, Laravel, and MySQL**, covering property listings, search and filtering, availability, pricing, bookings, user accounts, and payments.
- Implemented **booking and availability workflows**, including date validation, dynamic pricing, blocked dates, booking conflict detection, and **double-booking prevention**.
- Developed and maintained **payment gateway integrations**, handling payment initiation, success and failure states, transaction tracking, and booking-payment synchronization.
- Built **real-time website chat** using Laravel events and broadcasting, and extended **versioned APIs (V11/V12)** to support website features while maintaining mobile compatibility.
- Developed **admin dashboard features** and resolved **backend issues affecting the mobile application**, including validation, availability, booking, and payment bugs.
- Organized business logic using **Service Classes, Form Requests, API Resources, Policies, and database transactions**, with testing and debugging to validate changes.

Backend developer 03/2026 – Present | Egypt

Masane3 Online | B2B Manufacturing Marketplace

- Contributed to a **Laravel 12 and MySQL** backend connecting buyers and suppliers through **product catalogs, company profiles, and manufacturing inquiries**.
- Worked on **Request for Quotation (RFQ) workflows**, allowing buyers to submit requirements, quantities, and attachments, with **category-based matching** to relevant suppliers.
- Supported **supplier quotation management**, including submitting, viewing, updating, and deleting pricing quotations, and allowing buyers to review offers for their requests.
- Contributed to **product management APIs**, covering categories, attributes, variants, images, and certificates.
- Worked on **company-document review workflows**, including document submission, administrative approval and rejection, and company-status updates.
- Supported separate **buyer, supplier, and admin APIs** using **Sanctum authentication**, request validation, and structured API responses.

Backend Internship, NAMI 01/2024 – 04/2024 | Egypt

- Developed **RESTful APIs** with **PHP**, **Laravel**, and **MySQL**, implementing JWT authentication and role-based authorization.
- Built backend workflows for orders, carts, coupons, and cash/online **payments**, with **validation** and **error handling.**
- Implemented CRUD APIs with **filtering, sorting, and pagination** using Eloquent relationships, migrations, and query building.

Skills

- **Software Engineering** — **OOP**, SOLID, DS & Algorithms, **Git** , Design Patterns, **RESTful APIs**, **Database Transactions** , **System Design.** | **Databases:** MySQL, MongoDB | **Backend** : PHP, Laravel, **Node.js**, Express.js.

Education & Certificates

B.Sc.Computer Science, Menofia University 2020 – 2024 | Egypt
faculty of computer and information

Summer Training — Information Technology Institute(ITI) 07/2022 – 09/2022
Foundation of Web development: frontend, backend and databases.
