Ahmed Mandouh

BACKEND DEVELOPER | PHP / LARAVEL / NODE.JS

Egypt | +20 108 086 8769 | ahmedmandouh101@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Backend Developer with production experience delivering RESTful APIs for live booking and payment products. Strong in PHP, Laravel, MySQL, JavaScript/TypeScript, and Node.js, with practical expertise in API versioning, authentication, database design, transactional workflows, validation, and production troubleshooting. Builds maintainable backend services for high-impact user flows.

TECHNICAL SKILLS

Backend: PHP, Laravel, Node.js, Express.js

APIs & Security: RESTful APIs, API versioning, JWT, authentication, authorization, API Resources

Data & Delivery: Eloquent ORM, migrations, relationships, transactions, pagination, filtering, testing, debugging

Databases: MySQL, MongoDB

Engineering: OOP, SOLID, design patterns, service layer, dependency injection, Git

Languages: PHP, TypeScript, JavaScript, C++, Java

PROFESSIONAL EXPERIENCE

Backend Developer | Runsoft

Mar 2026 - Present | Egypt

Employer: Runsoft | Product: BayToStay | Google Play | App Store

- Develop and maintain production RESTful APIs in **PHP, Laravel, and MySQL** for **BayToStay**, a live short-term rental and booking platform.
- Implement core domain workflows for units, availability, pricing, bookings, users, payments, and booking lifecycle management.
- Build booking safeguards including date validation, dynamic pricing, blocked and booked dates, conflict detection, and double-booking prevention.
- Integrate and maintain payment workflows for initiation, success/failure states, transaction status, and booking-payment synchronization.
- Extend versioned APIs (V11/V12) while protecting mobile-client compatibility and enabling web-platform functionality.
- Implemented real-time website chat and use service classes, policies, API resources, events, Eloquent relationships, transactions, testing, and production debugging to deliver maintainable changes.

Backend Intern | NAMI

Jan 2024 - Apr 2024 | Egypt

Company: NAMI

- Developed RESTful APIs with **PHP, Laravel, and MySQL**, delivering backend business logic and data operations.
- Implemented JWT authentication and role-based authorization for distinct user types.
- Built CRUD APIs with filtering, sorting, pagination, validation, error handling, orders, carts, coupons, and payment workflows using Eloquent ORM.

SELECTED PROJECTS

GarageLog API | Personal Project

Laravel 11 | MySQL | Sanctum | PHPUnit

GitHub Repository

- Built a REST API for car-maintenance tracking with multi-car management, service histories, parts tracking, role-based access for owners, mechanics, and admins, plus filters and search.
- Implemented Sanctum authentication, database notifications, service reminders based on date and mileage, mechanic reviews, and **16 automated tests**.

Planit - Tour Booking Platform | Personal Project

Node.js | Express | MongoDB | JWT

GitHub Repository | Live API

- Developed a feature-rich REST API for travel and tour booking with CRUD operations, filtering, sorting, pagination, authentication, password resets, and a deployed API demo.
- Applied backend security practices including password hashing, validation, sanitization, HTTP security headers, and rate limiting; added health checks and regression-test foundations.

EDUCATION & TRAINING

B.Sc. in Computer Science, Faculty of Computers and Information, Menofia University — 2020 - 2024 | Egypt
