TECHNICAL SKILLS

Backend

PHP, Laravel, Node.js, Express, JavaScript, TypeScript

Data

MySQL, PostgreSQL, MongoDB, Redis

APIs

REST, API versioning, JWT, Sanctum, authorization

Tools

PHPUnit, Postman, Git, Linux, Docker, Podman

EDUCATION

B.Sc. in Computer Science

Faculty of Computers and Information, Menofia University

2020 - 2024 / Egypt

PROFILE

Backend developer working on production booking and payment APIs at Runsoft. I build the rules that prevent overlapping reservations, track balances, and keep web and mobile clients in sync.

PROFESSIONAL EXPERIENCE

Backend Developer / Runsoft

March 2026 - Present

- Develop Laravel and MySQL APIs for rental availability, pricing, bookings, and payments on BayToStay.
- Check requested dates against blocked and reserved periods. Track partial payments and outstanding balances as bookings change.
- Extend V11 and V12 APIs for web features while maintaining mobile compatibility. Implemented real-time website chat.

Backend Intern / NAMI

January - April 2024

- Built Laravel endpoints for orders, carts, coupons, and payments using Eloquent and MySQL.
- Implemented JWT authentication, role-based access, request validation, filtering, sorting, and pagination.

SELECTED PROJECTS

GarageLog

Laravel 11, MySQL, Sanctum, PHPUnit

Built vehicle service histories and reminders based on date or mileage. Implemented owner, mechanic, and admin access with 16 automated tests.

GitHub repository

Planit

Node.js, Express, MongoDB, JWT

Developed a tour booking API with search, pagination, password resets, request validation, and rate limiting.
